

Niana Kotori

Kotori is a really sweet girl. She's outgoing, caring, and athletic (being a member of her school's volleyball team). She's competent at just about anything without trying; her problem is that, as soon as she needs to do something (putting in conscious effort), she suddenly and utterly (often spectacularly) fails. This gives her a very carefree mindset, preferring to attack any and all problems head-on without any planning.

Appearance:

???

Battle dress: ???

Abilities:

In battle, she prefers to utilize her natural bulk and strength to her advantage, tanking hits and responding with devastating blows from her huge two-handed sword. Since speed and mobility are not her primary concern, her battle dress features heavy metallic armor to aid in her defensive abilities. Her signature, `[[Barrier]]`, allows her to boost even further, erecting a sphere of influence around herself that dissipates a high fraction of magical attacks. She struggles against foes with high mobility or hit-and-run tactics since she's generally unable to punish their attacks, though even they need to be wary about taking a stray hit from her.
